

Healthy Foods for Yorkies

2014'

Certain fruits and vegetables, such as onions, tomatoes, raisins, potatoes and grapes, contain acids, seeds and enzymes that are highly toxic to dogs.

For this reason, you must use caution when choosing healthy snacks to give to your dog. Some fruits and vegetables provide excellent health benefits and can make wonderful supplements if used in moderation.

Apples, watermelon, bananas, broccoli, spinach, pears, grapefruit, mango,

Peas, carrots, leafy greens, oranges, pumpkin. Given as a small snack.

All & any of these in moderation only.

***If any toxic items are swallowed , put pup in your tub, so as to contain vomiting area. Then, vomiting can be induced by using 1 capful/1 teaspoon of Hydrogen Peroxide. Pup should vomit shortly after, hopefully expelling the item.*

ALWAYS Consult your Veterinarian.
